

Las Positas and Modoc Roads Multiuse Path Update

Asphalt paving work for the right turn lane at the Las Positas and Modoc Roads intersection

The City's contractor has now completed paving of the Modoc Road street intersections between Calle De Los Amigos and Las Positas Road. Paving of the multiuse path along the Modoc stretch is tentatively scheduled during the last week of January. The contractor is working to finish the concrete access ramps and the installation of the street light foundations in advance of the scheduled path paving work.

Beginning on Monday, January 11 through October 2021, the contractor will install traffic control and make temporary striping changes to the Las Positas corridor between Modoc Road and Cliff Drive. The speed limit will be reduced to 35 mph and traffic will be shifted to allow enough buffer for construction work to occur safely. Drivers must temporarily share the road with cyclists and proceed cautiously within the Las Positas corridor during construction.

The City thanks the public for their continued cooperation and patience during construction of this important Vision Zero Project. For more information, please visit the Project website:
